

Instructions to install and configure Android development environment

Step 1: Extract the **adt-bundle-windows-x86.zip** in your preferred location (**C: drive** or **D etc.**)

Step 2: Extract the **windows_offline_sdk.rar** inside the **adt-bundle-windows-x86** folder

Step 3: Inside the **adt-bundle-windows-x86** folder go to **Eclipse** folder.

Open **eclipse** folder

Click on **eclipse icon**

Then **Eclipse IDE** will open.

In the **menu options** at the **top of Eclipse IDE**

Go to **Windows → Preferences.**

Then Preferences window will open

Click on **Android option** present in the **left panel of the Preferences window.**

At Right top, you will get **browse** button.

Click on **button** and **Select the location where you have unzip the windows_offline_sdk.**

Click on **Apply.**

Then click **OK.**

*******This completes android installation*******
